DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1, 2, 5, 6, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Yatrou et al. (United States Patent 5,343,522), hereinafter referenced as Yatrou.

Regarding claim 1, Yatrou discloses adaptive sparse echo canceller for active tap selection. In addition, Yatrou discloses an apparatus for canceling echoes over a communications channel, said apparatus comprising: means for implementing, at the start of a communications session over a communications line, a plurality of echo cancellers to cancel echo on said communications line, said echo cancellers each operating to cancel echoes that arrive during a predetermined bandwidth of time, said predetermined band-widths of time being non-overlapping; means for training each of said plurality of echo cancellers to produce a cancellation signal that cancels echoes arriving during the predetermined bandwidth of time associated with said echo canceller; and means for eliminating, after a predetermined training period, all echo cancellers that produce a cancellation signal below a predetermined threshold, as disclosed at column 3, line 12 through column 4, line 57 and exhibited in figures 3 and

Application/Control Number: 09/276,021 Page 3

Art Unit: 2644

Regarding **claim 2**, Yatrou discloses everything claimed as applied above (see claim 1), in addition, Yatrou discloses wherein said bandwidths of time are equal in width to each other, as disclosed at column 3, lines 38-62 and exhibited in figure 4.

Regarding **claims 5, 6, 8 and 9**, Yatrou discloses everything claimed as applied above (see claims 1 and 2). In addition, claims 5, 6, 8 and 9 are interpreted and thus rejected for the reasons set forth above in the rejection claims 1 and 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 3, 4, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yatrou in view of well know prior art (MPEP 2144.03).

Regarding **claim 3**, Yatrou disclose everything claimed, as applied above, (see claim 2), however, Yatrou fails to disclose bandwidths 16 milliseconds apart. However, the examiner takes official notice of the fact that it was well know in the art to provide bandwidths 16 milliseconds apart.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Yatrou by specifically providing bandwidths of various lengths including 16 milliseconds, for the purpose of determining the echo path length.

Application/Control Number: 09/276,021

Page 4

Art Unit: 2644

Regarding **claim 4**, Yatrou disclose everything claimed, as applied above, (see claim 1), however, Yatrou fails to disclose a graphical user interface to allow altering of the predetermined threshold. However, the examiner takes official notice of the fact that it was well know in the art to provide a graphical user interface to allow altering of the predetermined threshold.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Yatrou by specifically providing a graphical user interface to allow altering of the predetermined threshold, for the purpose of initial setup and programming of the DSP.

Regarding claims 7 and 10, Yatrou disclose everything claimed as applied above (see claim 8), in addition claims 7 and 10 are interpreted and thus rejected for the reasons set forth above in the rejection of claims 3 and 4.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jefferey F Harold whose telephone number is 703-306-5836. The examiner can normally be reached on Monday - Friday 9 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W Isen can be reached on 703-305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
